Newsletter of Stage Accompany International

Week 50/1991

Company News

Newsletter

In week 42, 43, 44, 45, 46, 47, 48 & 49 no newsletters were send.

Fire

Last weekend we had a fire in our testsystem. it is destroyed completely. We are working hard to replace the system as soon as possible. However we have to do the testing manually at this moment. This means we will have some delay in delivery the coming two months. Please check with Paul Spitzzen whether your orders are affected / delayed.

We hope everything will be normal again at the end of januari.

Stage News 3

Stage News 3 is ready! Please use the attached fax form today or asap to inform us how many copies you want. They will be send with normal post! You will receive 25 copies free; additional copies will cost Hfl 1,20 each. We will wait to send the free copies until we receive the fax back! So, also if you do not want any additional copies send the fax back!

Stage News 4

Stage News 4 will definitely be **released at the Frankfurter Messe**. Please inform us with the Fax whether you will support us with an article. Jos Peters will contact you than for the details.

Prices

Prices will be increased per januari 1st with +/- 7%. Excluded from this raise is the complete Economy line: '91 prices will be valid for '92. All orders that will come before januari 1st and have to be delivered before april 1st will be delivered against the '91 prices. Further, for those (big) clients that you have serious contact with and already send an offer (with the '91 prices) we will deliver for the '91 prices if you send this offer to us before 16-12-'91 by fax. We will send you the new price list at the end of december.

Video clip

Stage Accompany provided a lot of equipment as decor for the video clip of 'The Two Brothers On The Fourth Floor'; a Dutch House band. We can make copies for you of this (nice) clip (five minutes). One VHS copy is free but must be ordered! (use fax form). More copies are available on request at Hfl 30,- each and are separate packed in a box. Other formats are possible though we first see your reaction to decide whether copies are to expensive (if only one ordered for one format for example).

Product News

Performer series connector panels

Some problems have been reported to us about the Performer connector panels.

Trouble occurs after accidently connecting a 4816 or 4817 to a mid/high frequency output. The fan power supply is then shortcircuited through the DDC and signal wires to the output of the LF amplifier. The result may be a blown TIP 41C transistor in the connector panel.

We advise you to be carefull with the wiring of the performer system while our R&D department looks for a proper solution to this problem.
