

DOES YOUR CINEMA SOUND SYSTEM PAY FOR ITSELF?

Stage Accompany developed her Screen Series with a completely new approach to cinema sound; Not based on a modified PA system, but a truly dedicated cinema sound system with features such as Dynamic Damping Control (DDC™), Multi Color Option, Ribbon Compact Driver™ and Super Space Saving design.

By using the Ribbon Compact Driver™, the cabinets can be a mere 23 cm./9" deep, without any sacrifice of sound pressure or sound quality. As a result of the incredible shallow depth of the cabinets, the screen can be placed further back. By doing this, an extra row of (money making) seats can be added to any theater, big or small.

This means that you can actually have more revenue by choosing the Stage Accompany Screen Series for your cinema sound system!

Assumptions

- Average ticket price is ± \$ 7.50
- "full-house" (extra row fully occupied), once a week
- Theater open 52 weeks per year
- Cost of additional chairs and extra concessions revenues not included!

"Small venue" (up to 150 seats)

Assume 10 rows of 15 seats each;

This means a total EXTRA revenue of $15 \times \$ 7.50 \times 52 = \$ 5,850$

"Medium venue" (up to 300 seats)

Assume 15 rows of 20 seats each;

This means a total EXTRA revenue of $20 \times \$ 7.50 \times 52 = \$ 7,800$

"Large venue" (up to 500 seats)

Assume 20 rows of 25 seats each;

This means a total EXTRA revenue of $25 \times \$ 7.50 \times 52 = \$ 9,750$

SA's Super Space Saving design provides the option of hoisting the speakers, allowing for easy installation and maintenance (without screen removal) and it will increase your return on investment! **A small venue SA system will pay for itself in 3 years** (the extra row will at least generate 35% of the sound system cost price; Per year!).

The Screen Series has a system for every auditorium, from passive 2-way to tri-amped 3-way, completely flown behind the screen, with a depth of only 9". Together with SA subwoofers and surround speakers, *only* the Screen Series allows you to offer to your patrons all that today's movie soundtrack has to offer.

As we like to put it; your architect will love the Screen Series for its size, your accountant will love it for the additional income and your patrons will love it for superior sound!
